

Virtual DATE21 starting on February 1st

[1]

The virtual DATE2021 will take place in the first week of February: <https://www.date-conference.com/> [2]. The programme is just as extensive as in "normal" years. In addition to registering for the conference, you will once again have the opportunity to register free of charge as a visitor to the exhibition and thus also be able to attend the lectures in the Exhibition Theatre (organised by edacentrum): <https://www.date-conference.com/registration> [3]. We would like to draw your attention in particular to two highlights of the programme, which will be designed by two members of the technical advisory board of edacentrum:

- Mr. Klotz from Cadence organised a BarCamp (with participation of the makers of the edaBarCamps) and a Career Fair for the Young People Programme.
- Mr Heurung from Siemens-EDA will give an Exhibition Theatre Keynote on the topic "Digital Twin: the Future Is Now" and will also introduce the new name "Siemens EDA": <https://www.date-conference.com/node/894> [4]

The edacentrum team is looking forward to meeting many members of the EDA community on this occasion, at least online.
